

ST. THOMAS SCHOOL
CLASS –V ENGLISH WORKSHEET
PERIODIC TEST-III DECEMBER(2019-20)

Q I. Read the passage and answer the following questions:

Animation is an art where you can make inanimate objects come to life and where there is no limit to your imagination. Making animation films, however, is not so easy. It's a long tedious process which involves making small changes in picture frames which when projected on screen simulate movement.

Characters are made using a variety of materials like modelling clay, wire cloth etc. Movements are filmed frame by frame using the camera and the footage is transferred on to the computer and edited. Advancement in computer technology has further added in making this art fun with endless possibilities. The art of conveying specific messages in a very short time is what gives animation a universal appeal.

Like elsewhere, animation films are very popular among children in India also. Playing animated computer games and doing projects from animated educational CD-ROMs are also gaining popularity here.

Complete the following statements :

1. Animation means

_____.

2. The materials used to make characters are

_____.

3. Besides animated films, the two other activities based on 'Animation' popular among children in India are:

a. _____

b. _____.
